

THABO MPONYA

Full-Stack Software Engineer • C#/.NET • Vue.js & React • Azure

Johannesburg, South Africa | 079 520 8970 | mollo.t.mponya@gmail.com | tmponya.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 5+ years building scalable, secure, production-grade web and mobile applications. Core strength in C#/.NET (ASP.NET Core) backends paired with modern JavaScript frontends in Vue.js and React/TypeScript. Azure-certified, with hands-on experience across RESTful API design, relational databases (SQL Server / PostgreSQL), Docker, and CI/CD pipelines. Disciplined about clean architecture, SOLID principles and reusable component patterns, and comfortable translating business requirements into well-structured technical solutions across the full project lifecycle.

TECHNICAL SKILLS

Backend:	C# / .NET (ASP.NET Core), Node.js, Python (Django), PHP (Laravel), RESTful API design
Frontend:	Vue.js, React / TypeScript, Flutter, HTML5 / CSS3
Databases:	Microsoft SQL Server, PostgreSQL, MySQL, MongoDB
Cloud & DevOps:	Microsoft Azure (AZ-900, AZ-104), Docker, CI/CD pipelines, Git
Architecture & Practice:	Clean Architecture, SOLID, design patterns, Agile & full project lifecycle
Tools:	Azure DevOps, Figma, Linux, Cisco DevNet

PROFESSIONAL EXPERIENCE

Intermediate Software Engineer

Mar 2022 – 2026

Digital Solution Foundry

- Architected and maintained high-traffic web and mobile applications using C#/.NET, SQL Server, Vue.js and Flutter, applying clean architecture and reusable component patterns for maintainability.
- Designed and consumed RESTful APIs to integrate backend services with responsive, component-based frontend interfaces.
- Improved production performance and reliability through proactive feature enhancements, profiling and rigorous debugging.
- Collaborated with cross-functional teams — product, QA and design — to interpret requirements and deliver features across the full development lifecycle.

Full-Stack Software Developer

Oct 2020 – Nov 2021

Bahale Codes Software

- Built full-stack solutions across web and desktop platforms, improving UI/UX and delivery speed.
- Developed scalable RESTful APIs and database-backed architectures using Django, PostgreSQL and MERN-stack components.
- Produced high-fidelity prototypes and UI designs in Figma to accelerate the development cycle.

SELECTED PROJECTS

Multi-tenant SaaS Booking Platform (in development) — Appointment-booking platform for the SA beauty & wellness market. Next.js (App Router) + TypeScript front end, NestJS API, PostgreSQL 16 + Prisma, Redis + BullMQ, in a pnpm/Turborepo monorepo. Demonstrates modern microservice-style architecture and clean separation of concerns.

tsebo-IQ — Recruitment-agency web application. (tseboiq.netlify.app)

Scan-Ya — Asset booking / management system. (scanya.vercel.app)

EDUCATION & CERTIFICATIONS

- **BSc Information Technology** — North-West University
- **Microsoft Azure** — Fundamentals (AZ-900), Administrator Associate (AZ-104); AZ-305 & AZ-500 in progress
- **Additional** — Cisco DevNet Associate, Ethical Hacking (Udemy), MERN Stack Deployment
